Java-for-beginners-telusko

Nov 2024 - Present

udemy, Virtual

this course, you'll learn the most important and in-demand skills for core Java development

PROJECTS

[Team-Based Content Management Platform ↗](#)

Apr 2025

As a web developer, I designed and built a user-friendly, team-based content management platform with a focus on simplicity and accessibility for non-technical users. The platform allowed users to access personalized content based on their team affiliations and manage data, ensuring ease of use for individuals without technical backgrounds.

[Live Event Scoreboard ↗](#)

Nov 2024

I developed a live results page for a real-time event scoreboard, designed to track and display event scores as they happened. This was a standalone project aimed at providing real-time updates for participants and audiences to track performance during live events.

[Real-Time Data Breach Detection and Monitoring System ↗](#)

Mar 2025 - Present

The system is a crawler designed to scan data leak sites (e.g., Pastebin, Ghostbin) and dark web platforms, alerting users when their personal information is exposed. Using advanced web scraping techniques, the system integrates APIs for breach detection.

EXTRA CURRICULAR ACTIVITIES

- Organized college events and actively volunteered in numerous events, assisting with planning, coordination and development.
- Tech Team Member, InitiTech: Contributed to technical development and event coordination.
- Marketing Team, PESutakies: Assisted in event promotions and audience engagement.
- Tech Head, CBDA: Led the technical team, managing projects and solutions.
